

Financing and Schedule Updates

Water Meter Install

Important Updates

The Municipal Authority of the City of Sunbury

For More Information

If anyone has any questions or would like additional or more specific information, please contact Danny Ramer, General Manager, Sunbury Municipal Authority at : (570) 286-5858.

Water Meter Installation

In order to comply with the Pennsylvania Department of Environmental Protection's (PADEP) mandate, the Municipal Authority continues to move forward with the water meter project.

Grant & Low Interest Loan Award

The Authority recently received a grant in the amount of \$237,436.00 from the Commonwealth Financing Authority to help subsidize the water meter project.

The Authority also received a low interest loan from Pennvest to cover the remaining projected cost.

Accelerated Installation Schedule

Acceptance of the Pennvest loan money requires the Authority to start installing water meters on an accelerated schedule.

Below is the revised schedule highlighting key milestone dates:

Date	Action
Aug. 2009	Advertise the Project to Potential Bidders
Sept. 2009	Bid Opening / Award Contract
Oct. 2009	Issue Notice to Proceed / Installation Begins
Dec. 2010	Meters Installation Completed

Reminder Replacement of Galvanized Service Lines

If your property has a galvanized water service line, you are required to replace it with Type K Copper or Copper Tubing Sized (CTS) Polyethylene.

If you have a galvanized water service line, contact the Authority for the specific instructions to replace this line.

If you are unsure or unable to determine what type of service you have, please contact the Water Department at: (570) 988-1760.

We will set up an appointment to assist you in identifying the type of service you have.

The replacement of galvanized water service lines will need to be completed no later than December 31, 2009.

Reminder Separate Water Service Lines

All separately owned properties are required to have their own water service line.

The customer's water service line is the section of line that connects at the Authority's curb stop (located at or near the curb) and enters the customer's premise.

This portion of the service line is the property owner's responsibility to maintain and/or install.

If your separately owned property does not have its own water service line, contact the Authority at (570) 286-5858 for the specific requirement to have this line installed.

This work is required to be completed no later than December 31, 2009.

Monthly Billing Update

In preparation of our future billing which will be based on water meter usage, the Authority will be converting to a new monthly billing system. All property owners will receive one monthly bill for all services provided by the Authority.

The new bills will have a pre-addressed envelope attached for your payment convenience.

Postage will remain the property owner's responsibility. If you prefer to make payments in person, the Authority Office will be open our regular hours and our drop box is available 24 hours for your convenience.

All monthly billing will be transitioned with the September 2009 billing. You will receive this September bill in early October.
